

# Fabric Materials and Colour Options

**Choose from four different fabric materials: AmRay Eclipse, Flex-DC, Spangly and Nylon. All lead aprons come with a soft nylon lining for additional comfort.**

## AmRay Eclipse: The softest antibacterial fabric for superior hygiene and infection control.

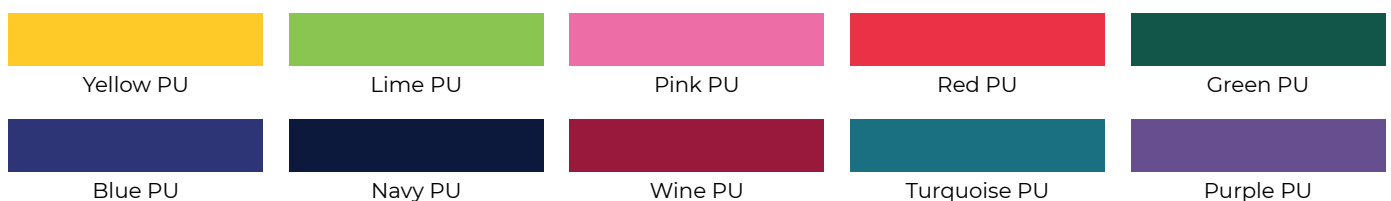

AmRay Eclipse is AmRay's second-to-none fabric for lead aprons that surpasses traditional apron fabrics in every aspect, providing exclusive antibacterial protection and significantly enhancing hygiene and infection control in lead aprons. This fabric's advanced properties also include resistance to water, stains, and blood, promoting long-lasting durability, superior hygiene and infection control.

## Flex-DC: Keeping you comfortable and flexible in your movements.

The Flex-DC fabric is a specifically formulated material unique to our manufacturer AmRay, which gives the wearer a lightweight flexible fabric that is hard-wearing and durable. Its flexible properties afford the wearer complete comfort and ease of movement, avoiding unwelcome bulging from bending, sitting or leaning. A polyurethane coating provides an easy-clean surface to avoid staining and provides high standards of hygiene.

## Easy-Clean 'Spangly': Making it easier to keep your apron clean.

In addition to the Flex-DC features, the Spangly fabric contains an additional coating to create an easy-clean surface resistant to staining.

## Standard Nylon

Nylon is a strong and lightweight fabric of high resilience which is easy to keep clean.
